Professional Summary

Honors graduate in Applied Technology specializing in Cloud Infrastructure, Automation, and Machine Learning Operations (MLOps). Highly proficient in bridging the gap between data science workflows and scalable containerized deployments. Fluent in English, Spanish (native), and Norwegian, offering strong asynchronous communication skills and cultural alignment for global and Uruguayan tech teams.

Core Technical Stack

- **DevOps & Cloud:** Kubernetes, Docker, Ansible, Puppet, Vagrant, YAML, CI/CD Concepts
 - **Machine Learning / AI:** Python, TensorFlow, Keras, Scikit-learn, Pandas, Google Colab
 - **Frontend / Full-Stack:** JavaScript, React, HTML5, CSS3, PHP, Java, Ruby
 - **Databases & OS:** PostgreSQL, MySQL, MariaDB, PL/SQL | Enterprise Linux, Windows Server, Active Directory
 - **Security & Networking:** CompTIA Security+, Kali Linux, Metasploit, Cisco Switching & Routing Configuration
-

Key Projects & Technical Experience

Lead Infrastructure & MLOps Engineer | *Predictive Health Monitor Dashboard (Portfolio Project, working on it)*

- **ML Pipeline:** Trained and optimized a Deep Learning classification model using **TensorFlow** and **Keras** to analyze complex biometric data.
- **API & Frontend:** Wrapped the model in an asynchronous **Python (FastAPI)** backend and built a dynamic **React** dashboard for real-time inference visualization.
- **Containerization:** Wrote multi-stage **Dockerfiles** for both services, optimizing image layers to reduce deployment footprint by 40%.
- **Orchestration & Automation:** Developed **Ansible** playbooks to automate local environment provisioning and successfully deployed the cluster into a **Kubernetes (Minikube)** environment using custom manifests.

Data Wrangler & Systems Analyst | *Academic & Open Source Research Projects*

- Architected enterprise relational databases utilizing **PostgreSQL** and **MySQL**, optimizing complex queries with advanced **PL/pgSQL** scripts.
- Conducted advanced data analysis, wrangling, and visual charting using **R (ggplot2, dygraphs)** and **Python (Seaborn, Plotly)** to interpret complex research datasets.

- Configured and hardened virtualized sandbox networks using **VMware**, **Hyper-V**, and **Vagrant** to execute penetration testing workflows.
-

Education

2019-2024

Brigham Young University - Idaho, Rexburg, ID

- [Bachelor of Science in Applied Technology \(July 2024\)](#)
 - Magna Cum Laude.
 - [3.95 GPA](#)
 - **Certificates Earned Degree-Track:** System Administration, Computer Programming, Computer Support
-

Professional Certifications

2020

- [Degree: Certificate Computer Programmer](#)
- [Certified PC Pro TestOut \(December 2020\)](#)
- [Certified Network Pro TestOut \(December 2020\)](#)

2021

- [Degree: Certificate Computer Support](#)
- [Certified Switching Pro \(July 2021\)](#)

2024

- [Degree: Certificate System Administration](#)
 - [Certified CompTIA Security+ SYO-701 \(Juli 2024\)](#)
 - [Transcript](#)
 - [Norwegian Certification](#)
-

Languages

- **Spanish:** Native proficiency
 - **English:** Fluent
 - **Norwegian:** Fluent
 - **Italian & French:** Professional working proficiency
